Unit Weight	2.5 lbs	Unit Weight w/package	3 lbs
Units Dimensions	5" x 8" x 12" (10" arm)	Unit Box Dimensions	14"x 5" x 4"

### Product Applications

The MS36B boom stand is designed for use with the complete line of Dino-Lite hand held microscope cameras and comes complete with a Dino-Lite scope mount assembly with fine adjustment feature. This sturdy and versatile boom stand utilizes an adjustable sliding horizontal boom arm with up to 10" reach and 360 degree rotational capability making it ideal for inspection applications where the ability to extend out over and across a specimen is required.

The precision machine crafted components provide smooth vertical and horizontal adjustment positioning in a well balanced and stable ergonomic design. Manufactured from a combination of resilient stainless steel and lightweight recycled aluminum, the MS36B can easily and conveniently be moved from one work area to another and endure the harshest of work environments (counterfeit ID, crime lab, etc), entertainment or simply as a reading aid. Just use your imagination!
