

SEIFERT ISOVOLT

Tripod Stand with Clamp for Tubehousing 160 M

Application

The tripod stand was developed to support the X-ray tubehousing at various inspection tasks (site inspection or similar).

It allows a simple and quick alignment of the X-ray tube to various exposure positions.

- Produced under ISO 9001 certified quality management system

Delivery Scope

- 1 Tripod stand
- 1 Clamp for X-ray tubehousing

GE imagination at work

Technical Data

Setting range	820 mm - 1810 mm / 32.3" - 71.3" (from floor level to beam center)
Rotation range 1	360° (X-ray tube in support)
Rotation range 2	360° (X-ray tube horizontally with clamp)
Weight	6 kg / 13.2 lbs

The stand is steplessly adjustable in height by telescopic legs in a range of 510 mm / 20" (820 mm - 1330 mm / 32.3" - 52.4" from floor level to beam center).

By an additional extension of the support on the stand, the vertical setting range can be extended by 480 mm / 18.9" (820 mm - 1810 mm / 32.3" - 71.3" from floor level to beam center).
