

LIGHT WEIGHT | HANDS FREE

The friction arm is a high quality, flexible, and easy-to-use support system. The system is suitable for many different applications including non-destructive testing (NDT) and UV-curing, enabling the operator to work with two free hands.

The friction arm is delivered with two clamps and one "foot". It can either be attached to a table top using the clamp or it can be placed on a flat stable surface using the "foot".

DESCRIPTION

- Jointed arm with just one large locking knob
- Length: 53 cm (21")
- Arm weight: 1.07 kg (2.35lb)
- Total weight: 2.55 kg (5.61 lb) complete
