

# SAFETY DATA SHEET

## 1. Identification

Product identifier	SIR-CHEM <sup>®</sup> DRY POW	DER 66 YELLOW
Other means of identification	Not available.	
Recommended use	Non-destructive testing.	
Recommended restrictions	None known.	
Manufacturer / Importer / Suppl	ier / Distributor information	
Company name	Circle Systems, Inc.	
Address	479 West Lincoln Ave. P.O Box 1228 Hinckley, IL 60520	
Telephone	815-286-3271	
E-mail	customerservice@circlesafe.co	m
Emergency phone number	Chem-Tel	800-255-3924 (US & Canada); +1-813-248-0585 (International)

# 2. Hazard(s) identification

Physical hazards	Not classified.	
Health hazards	Carcinogenicity.	Category 2
OSHA defined hazards	Combustible dust.	
Label elements Hazard symbol		
Signal word	Warning.	
Hazard statement	Suspected of causing cancer. May form com	bustible dust concentrations in air.
Precautionary statement Prevention Response	closed. Ground/bond container and receiving explosion hazard. Obtain special instructions precautions have been read and understood protection/face protection.	. Wear protective gloves/protective clothing/eye fore re-use. In case of fire: Use appropriate media
Storage	Store locked up. Store away from incompatik	ble materials.
Disposal	Dispose of contents/containers in accordanc regulations.	e with local/regional/national/international
Hazard(s) not otherwise classified (HNOC) Supplemental information	Not classified. Not applicable.	

## 3. Composition/information on ingredients

lixtures		
Chemical name	CAS number	%
Iron Powder	7439-89-6	< 95
Iron Oxide	1317-61-9	< 5
Titanium Dioxide (alternative CAS # 1317-70-0)	13463-67-7	< 5

4. First-aid measures	
Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Do not rub eyes. Rinse with water. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Dust may cause eye, skin and respiratory tract irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures	
Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2). Apply extinguishing media carefully to avoid creating airborne dust.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire-fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.

#### General fire hazards Heat may cause the containers to explode. May form combustible dust concentrations in air.

## 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Use only non-sparking tools. Wear appropriate personal protective equipment. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.
Methods and materials for containment and cleaning up	ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
	Large Spills: Sweep or shovel up material and place in a clearly labeled container for waste. Following product recovery, flush area with water.
	Small Spills: Collect dust using a vacuum cleaner equipped with HEPA filter.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	Minimize dust generation and accumulation. Routine housekeeping should be instituted to

#### ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Explosion proof exhaust ventilation is recommended. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Avoid prolonged exposure.

Keep containers tightly closed in a dry, cool and well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS). Keep away from heat, sparks and open flame.

8. Exposure controls/pers	sonal protection		
Occupational exposure limits			
US OSHA Table Z-1 Limits for	Air Contaminants (29 CFR 1910.100	00)	
Components	Туре	Value	Form
Titanium Dioxide (alternative CAS # 1317-70-0) (CAS 13463-67-7)	PEL	15 mg/m3	Total dust.
US ACGIH Threshold Limit Va	lues		
Components	Туре	Value	
Titanium Dioxide (alternative CAS # 1317-70-0) (CAS 13463-67-7)	TWA	10 mg/m3	
Biological limit values	No biological exposure limits noted for the ingredient(s).		
Exposure guidelines	No exposure standards allocated.		
Appropriate engineering controls	Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.		
Individual protection measures, Eye/face protection	, such as personal protective equip Wear safety glasses with side shields		
Skin protection			
Hand protection	For prolonged or repeated skin contact use suitable protective gloves.		
Other	Wear suitable protective clothing.		
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.		
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.		
General hygiene considerations	When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.		
9. Physical and chemical pro	operties		

Appearance		
Physical state	Solid.	
Form	Powder.	
Color	Yellow.	
Odor	Odorless	
Odor threshold	Not available.	
рН	Not available.	
Melting point/freezing point	2795 °F (1535 °C)	
Initial boiling point and boiling	Not available.	
range Flash point	Not relevant.	
Evaporation rate	Not relevant.	
Flammability (solid, gas)	Not available.	
Upper/lower flammability or explosive limits		
Flammability limit – lower (%)	Not relevant.	

Skin sensitization	This product is not expected to cause sl	kin consitization	
irritation Respiratory sensitization	Not a respiratory sensitizer.		
Serious eye damage/eye	Direct contact with eyes may cause temporary irritation.		
Skin corrosion/irritation	Prolonged skin contact may cause temporary irritation.		
LD50	Rat	> 11000 mg/kg	
Oral			
LC50	Rat	> 2.28 mg/l, 4 Hours	
Inhalation			
Titanium Dioxide (alternative CAS Acute	\$ # 1317-70-0) (CAS 13463-67-7)		
LD50	Rat	30 g/kg	
Oral	-		
Acute			
Iron Powder (CAS 7439-89-6)			
Components	Species	Test Results	
Acute toxicity	Expected to be a low hazard for usual in	ndustrial or commercial handling by trained personnel.	
Information on toxicological eff	fects		
physical, chemical and toxicological characteristics			
Symptoms related to the	Dust may cause eye, skin and respirato	ry tract irritation.	
Eye contact	Dust may irritate the eyes.		
Skin contact	Dust or powder may irritate the skin.		
Inhalation	Inhalation of dusts may cause respiratory irritation.		
Ingestion	Expected to be a low ingestion hazard.		
Information on likely routes of			
11. Toxicological informati	on		
products			
Hazardous decomposition	Strong oxidizing agents. No hazardous decomposition products are known.		
Incompatible materials	Contact with incompatible materials. Strong oxidizing agents.	-	
Conditions to avoid	Keep away from heat, sparks and open flame. Minimize dust generation and accumulation.		
Possibility of hazardous reactions	No dangerous reaction known under co	nditions of normal use.	
Chemical stability	Material is stable under normal condition		
Reactivity		under normal conditions of use, storage and transport.	
10. Stability and reactivity			
VOC (Weight %)	Not applicable.		
Other information			
Viscosity	Not available. Not relevant.		
Decomposition temperature	Not available.		
(n-octanol/water) Auto-ignition temperature	Not relevant		
Partition coefficient	Not relevant.		
Solubility(ies)	Insoluble in water.		
Specific gravity	2.5 ( <sup>68</sup> ° F (20 °C))		
Vapor density	Not relevant.		
Vapor pressure	Not relevant.		
Explosive limit – upper (%)	Not available.		
Explosive limit – lower (%)	Not available.		
(%)			

Germ cell mutagenicity	No data available to indicate product or any components present at greater than 0.1% are		
Carcinogenicity	mutagenic or genotoxic. Suspected of causing cancer.		
IARC Monographs. Overall E	•		
Titanium Dioxide (alternati (CAS 13463-67-7)			
Reproductive toxicity	This product is not expected to cause reproductive or developmental effects.		
Specific target organ toxicity – single exposure	Not classified.		
Specific target organ toxicity – repeated exposure	Not classified.		
Aspiration hazard	Not an aspiration hazard.		
Chronic effects	Prolonged inhalation may be harmful.		
12. Ecological information			
Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.		
Persistence and degradability	No data is available on the degradability of this product.		
Bioaccumulative potential	No data available for this product.		
Mobility in soil	Not available.		
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.		
13. Disposal considerations	3		
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.		
Waste from residues / unused products	Dispose of contents/container in accordance with local regulations. Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
