

FOR IMMEDIATE RELEASE

## **Test Equipment Distributors & AINDT Partner to Provide NDT Training**

TROY, MI – JUNE 1, 2023 – TEST EQUIPMENT DISTRIBUTORS (TED) is pleased to announce that it is now offering nondestructive (NDT) training from The American Institute of Nondestructive Testing (AINDT) to its large base of customers throughout North America. This partnership between two leading providers of products and services in the nondestructive testing industry will provide a wide selection of in demand training courses.

Don Booth, CEO of AINDT, founded the institute in May 2013 and has since celebrated its tenth year in business. "We are thrilled to partner with TED and expand our reach in the industry," said Booth. "This partnership brings together two dedicated organizations with a shared vision for providing quality products and services to the NDT market across the globe."

TED's President, Mike Hamel, echoed Booth's enthusiasm for the new partnership. "We are excited about this opportunity to work with AINDT and offer our customers access to a comprehensive range of nondestructive testing training courses," said Hamel. "We believe that this collaboration will help equip our customers with the knowledge they need to stay ahead in their respective businesses."

TED and AINDT will provide courses covering a variety of methods such as radiography, ultrasonic testing, liquid penetrant testing, magnetic particle testing, visual testing and eddy current testing. Customers can choose from online or online-hands-on blended learning options that are designed for both beginners as well as more experienced technicians looking for advanced skills development. As always, AINDT Level III staff will continue to provide student support and tutoring through email, phone and video conference.

With the launch of this new partnership between TED and AINDT, companies now have access to top-notch educational resources while saving time and money. As Don Booth stated: "Our mission is simple: To provide excellent training materials at affordable prices so that businesses can continue their success without sacrificing quality education."
